

## SACS Capital Projects

SACS has embarked on a number of large capital projects recently in an aim to offer our parents and pupils some excellent facilities. SACS built eight new classrooms in 2014 and began a computer network upgrade at the beginning of 2016 to enable our boys and teachers to have faster Internet speed and better network capability.

Along with our many different scholarship programs to enable boys from disadvantaged backgrounds the opportunity to attend SACS, we continue to look to ways to improve what SACS can offer.

We embarked on a Seating Pavilion Project in 2014 and after 4 years, we are ending the construction of this great facility. The facility is designed mainly to protect the boys, Old Boys' and parents from the elements when supporting rugby matches. During summer, the boys and parents will be able to watch cricket matches on both the Memorial field and Spencer Smith field. This facility acts as a functions venue in the summer with the beautiful mountain in the background. It also provides much need ablutions for Old Boys, supporters and parents when they attend sporting fixtures.

We started an appeal for donations to fund this project under the "Take a Seat" initiative. We were able to raise R2 million from this appeal. The school, through the "Building and Development Fund" has funded most of the balance. Due to the VAT increase to 15% and some extra seating which we added to accommodate more spectators on this stand, we are requiring some additional funding. If you are in a position to contribute towards this "Take a seat" fund, then please contact Mr Barry van Selm. R20 000 donation will get you a virtual seat and your name on the contributions board. We would really value your support.

### TAX DEDUCTABLE

We can issue a section 18 (a) Tax certificate for donations larger than R5000. Your name will appear on the donors' board if donations exceed R20 000. This board will be placed somewhere at the pavilion.

If you are in the position to donate funds, please contact Barry van Selm via email [vanselmb@sacollege.org.za](mailto:vanselmb@sacollege.org.za) and he will make contact to facilitate any queries.
